U.S Leaders Equity Fund

A sub-fund of EII Voyager Fund plc

Class A Shares (ISIN#: IE0002686263)

OBJECTIVES AND INVESTMENT POLICY

The objective of the U.S. Leaders Equity Fund (the **Fund**) is to provide long term capital growth by investing in companies that the Sub-Investment Adviser believes to be undervalued.

We invest primarily in a diversified portfolio of shares (equity) and equity equivalents of companies which are either established in the U.S. or which derive a significant portion of their revenues and/or profits from the U.S. We may invest up to 20% of the net assets of the Fund in the shares of non-U.S. companies.

We may also invest in cash, money market instruments and investment grade bonds from time to time.

You may redeem shares of the Fund usually on each business day.

The Fund's performance goal is to achieve a long term rate of return greater than the equivalent return provided by the S&P 500 Index and greater than that which could be obtained from a riskless investment.

Dividend income is reinvested into the Fund.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 3 to 5 years.

For more information about the investment objective and policy of the Fund, please see **Schedule 6** of the Fund's prospectus (the **Prospectus**).

RISK AND REWARD PROFILE

The Synthetic Risk and Reward Indicator (**SRRI**) identified by the above risk category shows where the share class ranks in terms of potential risk and return. It is not a measure of the risk of capital loss but is based on the volatility of the returns (past performances). The main limitations of the SRRI are:

- historical data may not be a reliable indication for how the Fund will perform in the future
- the risk category shown is not guaranteed to remain unchanged and may shift over time
- even the lowest category does not mean your investment is 'risk free'

The SRRI of the share class is ranked at 6. The share class is in category 6 because of the high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following risks are not adequately captured by the SRRI:

Liquidity and Settlement Risks: The Fund will be exposed to a credit risk on parties with whom it trades and will also bear the risk of settlement default.

Political Risks: The Fund's assets may be affected by uncertainties, such as political developments, changes in government policies, taxation and currency repatriation and restrictions on foreign investment in some of the countries in which the Fund may invest.

A more detailed description of all the risk factors that apply to the Fund is set out in the section entitled Risk Factors of the Prospectus.
