“Euro Class I Units” a unit class of EII Global Property Fund

A sub-fund of EII Property Funds

ISIN#: IE00B2NY0N50

This Fund is managed by EII Real Estate Securities Advisors Limited

OBJECTIVES AND INVESTMENT POLICY

The investment objective the EII Global Property Fund (the **Fund**) is to provide long term appreciation through obtaining exposure to Property Company equities and equity related securities which are listed on major exchanges and markets located throughout the world.

The investments of the Fund will primarily be selected from the securities that are the constituents of the FTSE EPRA/NAREIT Developed Index Net TRI (the **Index**). As it is not intended to track the Index, the Investment Manager will not be constrained by the weightings of the constituents of the Index.

The Investment Manager may, for example, increase the exposure of the Fund to countries or sectors considered by the Investment Manager to have positive real estate fundamentals or decrease the exposure of the Fund to countries or sectors considered by the Investment Manager to have negative or neutral real estate fundamentals.

You may buy or sell units on demand on each Dealing Day being a Business Day subject to the terms set out in the prospectus of the Fund (the **Prospectus**).

Income arising from the Fund is intended to be distributed to unitholders annually within one month of the end of each accounting period or at such other times as the manager may determine (subject to adjustments as may be appropriate). Distributions will be re-invested for additional units unless unitholders request them to be paid in cash.

Please see the Prospectus in particular the sections entitled ‘Investment Objectives, Policies and Restrictions of The EII Global Property Fund’, ‘Further Investment Restrictions’, ‘Distribution Policy’, ‘Application for Units’ and ‘Repurchase of Units’ where full details are disclosed.

RISK AND REWARD PROFILE

The Synthetic Risk and Reward Indicator (**SRRI**) identified by the above risk category shows where the unit class ranks in terms of potential risk and return. It is not a measure of the risk of capital loss but is based on the volatility of the returns (past performances). The main limitations of the SRRI are:

- historical data may not be a reliable indication for how the Fund will perform in the future
- the risk category shown is not guaranteed to remain unchanged and may shift over time
- even the lowest category does not mean your investment is ‘risk free’.

The SRRI of the unit class is ranked at 5. The unit class is in category 5 because of the high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following risks are not adequately captured by the SRRI:

Operational risk: REITs are dependent upon management skills and may not be diversified; are subject to the risk of financing projects; are subject to heavy cash flow dependency, default by borrowers, self-liquidation and failing to qualify specific tax-free pass-through of income and to maintain exception from specified trust laws.

Additional risks where the Fund invests in securities of issuers located in Emerging Markets include: currency depreciation, country risk, stock market practices, information quality, corporate governance and investor protection, settlement and custodial risks.

A more detailed description of all the risk factors that apply to the Fund is set out in the section entitled Risk Factors of the Prospectus.
